Conditions of use</div> <div>3.1. Application scope:</div> <div>This product is applicable for Zone 22 and Zone 2 hazardous areas where IIA, IIB, IIC gases, vapours, air and IIIA, IIIB, IIIC dust may exist.</div> <div>3.2. Service condition:</div> <div>1) Specific condition of Use for ATEX/IECEx certificate:</div> <div>i) The conquest-S29(EX201) industrial intrinsically safe smartphone terminal shall only be charged in safe area using a charger approved as SELV or Class 2 equipment against IEC 62368 or an equivalent EN/IEC standard. The maximum voltage and current from the charger Um and Im shall not exceed 9.0 Vdc and 2.0A respectively. The ambient temperature during charging shall be in the range 0°C to +45°C</div> <div>ii) Any Data download devices via the USB interface shall be approved as SELV or Class 2 equipment against EN/IEC 62368 or an equivalent EN/IEC standard. The maximum voltage Um from the device shall not exceed 5.5 Vdc.</div> <div>iii) Only a passive headset could be connected via the headset port in the non-hazardous area.</div> <div>iv) While in the non-hazardous area, a SIM/TF card may be inserted or removed.</div> <div>v) When using, the rubber plug of the headset and USB interface must be properly installed. The device cannot be connected with any accessories such like a headset in hazardous location.</div> <div>vi) The equipment shall only be used in locations where there is a low risk of mechanical impact.</div> <div>vii) Only a passive Antenna could be connected via the Antenna port.</div> <div>3.3. Do not use in strong corrosive gas environment;</div> <div>3.4. Pollution degree: class 3.</div> <div>4. Structural features</div> <div>5 / 8</div>	<div>ST-2D-ED-030 V1.0</div> <div>4.1. The enclosure is constructed from PC covered by silicone rubber, with a toughened glass window. The battery pack is integral with the unit and is not user-replaceable.</div> <div>4.2. The equipment has no electrical connections while in the hazardous area. There is a port for connection to a headset and a USB interface for data communication in the non-hazardous area only.</div> <div>5. Installation, Operation and Maintenance</div> <div>5.1. CHECK BEFORE INSTALLATION AND USE</div> <div>Before installed, the basic technical data listed on nameplate should be checked whether conform to actual using conditions or not.</div> <div>The end user is responsible for the suitability of the materials in the enclosure with regard to the possibility of chemicals in the usage area.</div> <div>Do not operate product if damaged the smartphone shell.</div> <div>5.2.CHARGING:</div> <div>1) Insert the male charger plug into the female socket on the bottom of the smartphone.</div> <div>2) Plug the charger into the electrical outlet to begin charging.</div> <div>3) WARNING:</div> <div>DO NOT OPERATE THE PRODUCT WITH THE CHARGER CONNECTED</div> <div>DO NOT CHARGE OR OPEN PRODUCT IN HAZARDOUS AREA</div> <div>USE APPROVED CHARGER ONLY. MAXIMUM CHARGING VOLTAGE AND CURRENT: Um =9.0V, Im = 2.0A</div> <div>5.3.ENVIRONMENTAL</div> <div>At the end of its technical life, the battery should be sent to a suitable recycling center or returned to point of purchase.</div> <div>5.4.BATTERY CONDITIONING</div> <div>Rechargeable Batteries</div> <div>a) Hazardous location safety approvals for explosive environments are only valid for the Conquest battery pack that is supplied with the smartphone.</div> <div>6 / 8</div>	<div>ST-2D-ED-030 V1.0</div> <div>b) Smartphones should only be charged in a non-hazardous location.</div> <div>c) Smartphones should only be charged using the Conquest charger base that is supplied with the Smartphones.</div> <div>d) Smartphones should be charged and operated between the temperatures shown:</div> <div>Charge Temperature: 0°C to +45°C</div> <div>Operating Temperature: -20°C to +60°C</div> <div>e) Always dispose of all batteries properly at an approved battery recycling center.</div> <div>6. Storage condition</div> <div>Ambient temperature -20°C~+60°C</div> <div>Related humidity (Ambient temperature 25°C) ≤95%</div> <div>The products shall be stored in an environment free from corrosive gases, steam and dust that may damage the metal, engineering plastics and their insulation properties.</div> <div>7. External Appearance</div> <div>See Figure.</div> <div>7 / 8</div>	<div>ST-2D-ED-030 V1.0</div> <div></div> <div>Shenzhen Conquest Communication Equipment Co., Ltd.</div> <div>Floor 2, Building B, Banweiyuan, No.17 Yongxiang Road, Bantian Street, Longgang District, Shenzhen, China</div> <div>8 / 8</div>

Problem	Solution																								
Abnormal microphone/ Speaker/Receiver behavior post drop in water	Shake the phone dry to make sure the water is out of membrane. Use the hair dryer to quickly dry the excess water to restore the volume to normal.																								
App Crashes/Freezes/Unable to recharge/Restart frequently	Quick restart often solves minor issues with phone. On the right side of the phone you will find a power button. Restart the phone using that button.																								
Magnetic charger/Dock charger not working	Check the charger and the contact position for any signs of dirt or oxidation. A quick wipe with cotton swab and alcohol should solve the issue.																								
Abnormal power consumption	First, you should try to dim the screen brightness and turn off the GPS, WiFi and Bluetooth if you are not using them. Additionally, you should check your Battery Usage in your phone Settings and see which apps are using more battery. You can close or disable the ones that are draining more battery if you usually do not need them.																								
Unable to register the SIM card	If after proper installation of SIM card the phone doesn't recognize the network try switching the flight mode on-and-off or try restarting the phone. If the issue still persists clean the chip with alcohol and cotton swap.																								
MicroSD card does not work	Your microSD probably has errors and your phone is not recognizing that card. Try to connect a card reader to your PC and format the microSD card at least two times. Restart your mobile phone and insert the SD card again.																								
Mobile network not registering Internet access	Go to settings-Network&Internet-Mobile network-Mobile data-switch it on. Or slide the screen to shortcut menu-click the signal icon on upper right corner of the mobile data network- switch it on.																								
Restore to factory setting	Please note factory reset will erase all the data from the phone,so make sure you take the backup of data before you do a factory reset. Open settings-System-Advanced-Reset options-Erase all data (factory reset).
